User Personas

Ted

Ted is about to turn 22 and spent his 21st birthday in lockdown at home away from his college where he is a Junior. The lack of social interaction over the last year has Ted feeling down and social media just seems to be feeding that cycle. Ted wants to develop some new self-care habits to help break the cycle but mostly to ease the boredom.

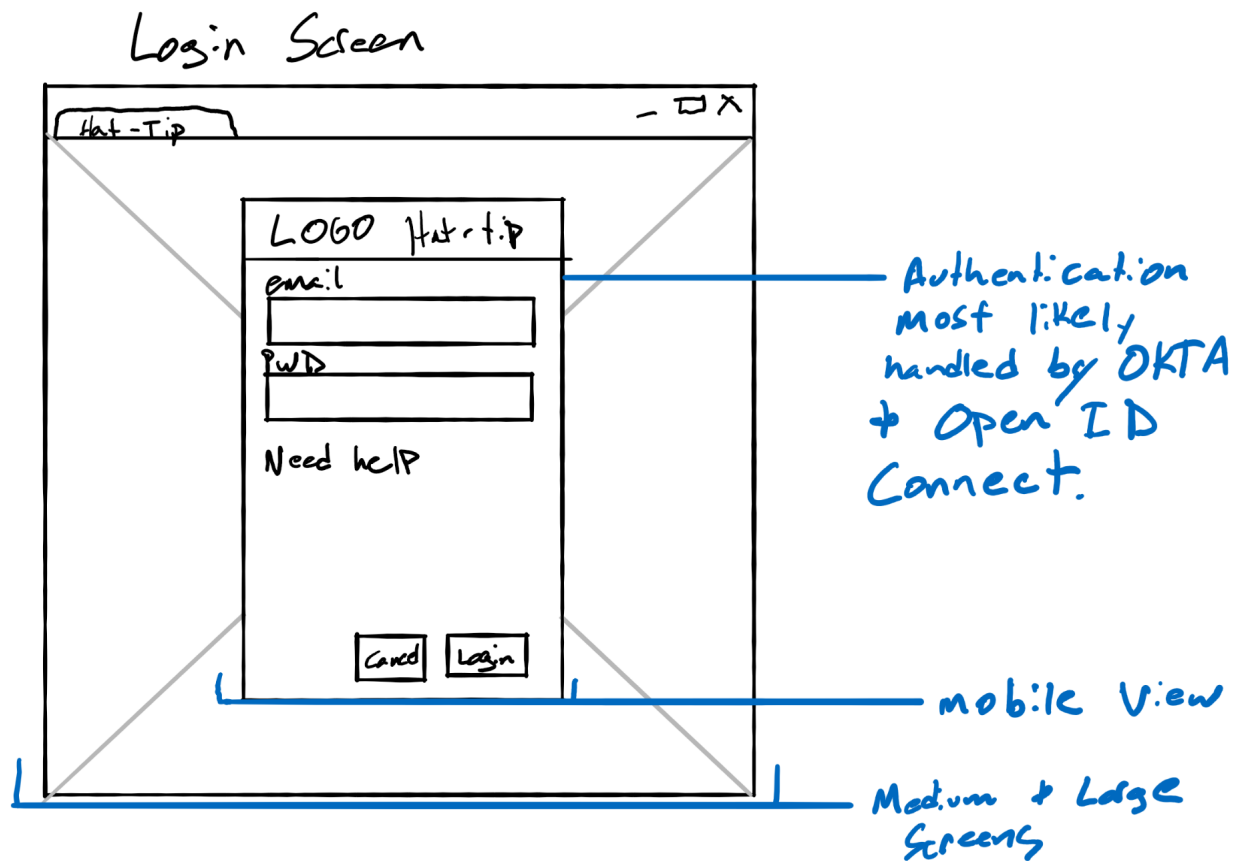

Lily

Lily is a 34 year old mother of two, ages three and eight. Lily works full-time but has transitioned to a remote work scenario in response to the pandemic. Though Lily's job is flexible, it is still difficult to balance one child in remote classes and a toddler seeking attention. When Lily is done working and finds some time to herself, she likes to reflect and decompress in a way that does not cut into precious free time.
